the power of elōs

Beautiful Skin.

Choosing a solution for the treatment of wrinkles was once a confusing and difficult decision. Many methods and technologies promise the best results, but most fall short.

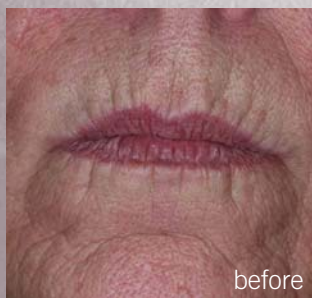

elōs™, a new revolutionary technology, has changed everything.

Simply put, elōs is proven to be the safest, most effective and comfortable solution for the superior results you demand.

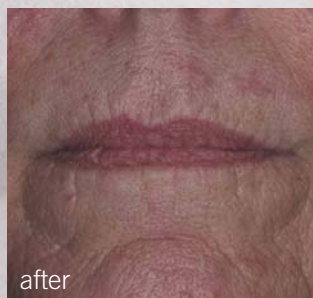

According to Dr. Michael I. Kulick,

"The results obtained with elōs demonstrate significant reduction in the signs of aging. Improvement of the wrinkles in these cases is dramatic, and from my experience is equivalent to laser resurfacing."

before

after

Significant reduction in wrinkles after only three treatments.

First there was laser technology.

Then IPL technology.

Now elōs.

Look as young as you feel, with elōs.

What is elōs?

The revolutionary new elōs technology is the first and only combined-energy technology. We use the power of bi-polar radio frequency and light energies – because two energies are better than one. Aesthetic technology powered by elōs is designed to be the safest, most effective and comfortable aesthetic technology available. Polaris and Galaxy – powered by elōs.

How does elōs work?

elōs uses a unique combination of radio frequency and light to isolate the treatment area and leave the surrounding skin free from potentially harmful side effects. The unique Matrix heating produces results at both the surface and deep dermal levels. That means that the combination of energies treating at multiple levels makes it possible to treat fine wrinkles at the surface while penetrating into the dermis to treat deeper wrinkles – all in the same procedure.

elōs outperforms systems that use only one energy.

Is this a no-downtime procedure?

Absolutely. elōs procedures require no sedation. The average procedure takes less than 30 minutes to perform. And you can put your make-up on right afterward and return to work or your daily schedule with no problem.
